

Unit 2: Assignment 5: The Pyramid of Civilization

1. On a piece of loose leaf, trace the blocks shown in the figure on page 12 of the text *Origins: Society and Civilization*.

- Cut out the blocks and arrange them in the space below according to their shape.
- Explain the sequence of blocks from the base to the top. How does one block build upon the one below it? For example, what led to a food surplus and what, in turn, did a food surplus lead to? Write your answer in the space immediately below.

- Do you agree with the order of development represented in the pyramid? Write your answer in the space provided immediately below.

- Draw a blank pyramid and then place the names of the available pieces from the image (page 12) in the order you think they should actually be in. Explain the reasons for your changes in the space provided.

2. Use *Google* to find a definition for the practice of *metallurgy*. Write the definition in the space below along with the URL for where you got your definition.

URL:

- Then list five ways in which your life would be different if metallurgy did not exist and explain how you would adapt to the change. Write your answer in the space provided below.

1.

2.

3.

4.

5.
